VOLUME 49 NO. 10

Authorized as second class mail,
Post Office Department, Ottawa.

GLEICHEN, ALBERTA, WEDNESDAY, MAY 23, 1956

SUBSCRIPTION \$2.00

Prize Winners 4-H Show

A good crowd turned out to attend the 4-H Calf show and sale, held in curling rink last Saturday. Some fifty-four animals were entered by the Cluny and Gleichen members.

The show was well organized and no hitches or delays occurred. The prizes and donors for the Gleichen Club were as follows:

Champion, trophy by Reg Howard, won by H. Yule.
Reserve, trophy by Leo Woods, I. Yule.

Third, trophy, H. Sauve.

Best Hereford, trophy, H. Sauve.

2nd Hereford, trophy, C. Sauve.

3d Hereford, trophy, G. Habke.

Best Shorthorn, trophy by O. Nerland, H. H. Yule.

2nd Shorthorn, trophy, K. Lilja.

Best Angus, trophy by Shoprite, Irwin Yule.

2nd Angus, trophy, Sheryl Desjardine.

3rd Angus, trophy, A. Yule.

First showmanship Green Kit, T. Eaton Co., Irwin Yule.

2nd showmanship, show stick, Allan Yule.

Best groomed calf, hoof trimmers, Ronald Sauve.

2nd best groomed calf, hair clippers, I. Yule.

Cluny prizes:

Champion, trophy, Don Fraser.

Reserve, trophy by W. D. Prouse, Lynn Gordon.

Best Hereford, halter, Don Fraser.

2nd Hereford, show stick, Lynn Gordon.

3rd Hereford Kit, Ruth Sammons.

Best Angus, halter, Duane Prowse.

2nd Angus, show stick, Dale Prowse.

3rd Angus, kit, Madeline Prowse.

Best Shorthorn, halter, Bob Splidit.

2nd Shorthorn, show stick, Ken Fraser.

3rd Shorthorn, kit, Neil Stewart.

First showmanship, groom kit, T. Eaton Co.

2nd showmanship, R. Haskayne, Lynn Gordon.

A. R. Brown has written more than 650 scripts for the CBC, and answered innumerable gardening queries from listeners. Inset in the picture is George Secord, of Winnipeg, who throughout the

Gardener's radio career has been his "voice." Mr. Secord says he doesn't know a hoe from a spade, but hundreds of people write to say how much he sounds like a real old "prairie gardener."

Sports Day Successful Affair

Considering the fact that the farmers are far behind in seeding a good sized crowd turned out Monday to enjoy Gleichen's annual May day sports.

Children's races for all ages were run off to the delight of the youngsters and their parents.

A lot of good horses were brought in for the horse races.

Perhaps the most interesting race of the afternoon was the children's race. Hugh Wilson's young son attracted attention as he rode up and down the track before the start of the race. He was the youngest and smallest of the riders yet he rode with the non-chalance of a veteran horseman. During the race the young folks cheered to the echo. The winner was Allen of Vulcan and the Wilson boy second.

In the first baseball game Standard defeated Gleichen. The second game saw Standard again win when they defeated Brooks.

HERE AND THERE

Dale Hunter of Edmonton spent his weekend in town visiting his parents.

Mr. and Mrs. R. Nason are receiving congratulations on the birth of a son May 3rd.

Mr. and Mrs. W. Shupe and family spent the holiday weekend in Banff.

Mr. and Mrs. Steve Fluter and daughter Cathie, of Claresholm spent the weekend in town visiting at the home of the latter's parents Mr. and Mrs. Cliff Kilcup.

Mr. and Mrs. Henderson and son, of Letbridge spent Sunday and Monday in town visiting the latter's parents Mr. and Mrs. Wm. Cook.

In the absence of the minister, Rev. W. Morrison of United Church who is attending the Alberta Conference of the United Church in Knox United Church, Edmonton. The service at 12:20 next Sunday will be in charge of the W. A. of the church.

A very pleasant afternoon was enjoyed by some 20 relatives and friends at the home of Mr. and P. Warner last Wednesday. The honored guest being Mrs. J. Sammons who was 85 years old that day. Her birthday has been celebrated by her relatives at one of her daughter's homes for several years. During the afternoon several pictures of Mrs. Sammons and the guests were taken on the lawn. She received some nice presents and a nice assortment of birthday cards. A beautiful bouquet of red and white carnations was presented to Mrs. Sammons by the local F. W.U.A. Two birthday cakes, covered with candles were lit and blown out by the honored guest. After which a delicious lunch was served by the hostess, and everyone enjoyed a social time together.

Trip to Mountains Follows Nuptial Rites

Afternoon rites were solemnized at St. Michael's and All Angels Church, Calgary, when Miss Lillian Margaret Bogstie, daughter of Mrs. Helen Bogstie and the late Mr. J. O. Bogstie of Calgary became the bride of Mr. Leslie C. Menard, son of Mrs. D. Menard and the late Mr. E. Menard of Gleichen. Rev Douglas Ford performed the double ring ceremony.

The bride was escorted to the altar by her eldest brother, Mr. Clifford Bogstie, of Trail, B. C. She chose a floor length gown of Chantilly lace and tulle over bridal satin. The skirt was trimmed with tulle draping and seed pearls, and the gown was modified with a Chantilly lily point sleeve lace bolero. Her finger tip veil of illusion net misted from a sweetheart hat which was dotted with pearls. She carried a cascade bouquet of red Delight roses and lily-of-the-valley.

Bridal Attendants

Mrs. Dorothy Yule sister of the bride and Mrs. Mary Evans, were attired in waltz length gowns of nylon net over taffeta with matching net hats of pink and yellow respectively. They carried bouquets of blue and pink carnations and stephanotes.

The flower girl, little Miss Joanne Bogstie, niece of the bride, was dressed in a frock of sheer blue nylon organza trimmed with baby lace and rosettes. She wore a bandeaux of pink sweetheart roses and carried a basket of mixed flowers and gardenias.

Master Dale Bogstie, nephew of the bride was ring bearer.

Mr. George E. Evans was best man. The guests were ushered by Mr. Allen Bogstie, brother of the bride and Mr. Rod Leggett, friend of the groom. During the signing of the register "The Wedding Prayer," was beautifully rendered by a member of the church choir.

A reception was held in the Club Skyroom where Rev. Mr. Ford proposed the bridal toast.

Following a honeymoon trip to the mountains Mr. and Mrs. Menard will reside in Gleichen.

Since the end of World War II Canada has advanced more than four billion dollars in financial aid to foreign countries. Gifts to other countries have amounted to \$1,858,855,000, or nearly half the foreign aid total in the period.

Good morning... I'm your

Census Taker

When I call at your home during the next few weeks I will have only a few simple questions—the name, age and marital status of those living at your address. If you live on a farm, there are some additional questions about acreage, crops, livestock and equipment.

The information you give me will be kept in strict confidence.

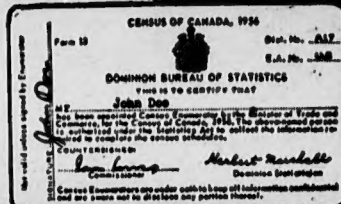

Every Census worker has taken an oath of secrecy. By Act of Parliament, the personal information gathered by the Census about individual Canadians can be used only for general overall statistics. It cannot be disclosed to any government agency or private organization.

Canada is taking count to keep up with her rapid growth. Census facts are required to meet and plan overall national needs—schools, public utilities, welfare services, farm and industrial production, employment.

The 1956 Census —
the essential measure
of Canada's
growth.

It's a big job—your cooperation will help us do it quickly and accurately.

Every census taker carries this official identification card to show that he or she has been appointed by the Government of Canada to help take the Census. Ask to see it.

DOMINION BUREAU OF STATISTICS
Department of Trade and Commerce, Ottawa

Census

This year Canada takes a significant step forward in the development of population and agriculture statistics. On June 1st the Dominion Bureau of Statistics will take the country's first five-year census on a nation-wide scale. Dominion Statistician Herbert Marshall reports that a task force of about 10,000 census takers will canvass the country to find out the effects of developments in the last five years on the distribution of the population.

Canada is now growing so rapidly and changing so much that five year census is necessary to provide government and industry with accurate figures for intelligent forecasting and planning. In the past the bureau has taken a national count only once every ten years, the last in June 1951. In other years it has published June 1st population estimates for Canada and the provinces, calculated by adding births and immigration and subtracting deaths and an estimate of emigration. The national estimates are reasonably accurate, although the margin of error increases with each year. The provincial estimates are another matter. Between census dates the measurement of the movement of people between provinces is difficult, and in the last few years in particular, these shifts have been pronounced.

The distribution of the people within the country is a matter of paramount importance to government and industry, for development plans and the expenditure of huge sums of money are based upon the figures. Per capita grants for example, have been the basis of the Dominion-Provincial tax agreements. Then too, some provincial governments provide assistance to municipalities on a per capita basis. One of the most important changes in the last five years has been the rapid building of suburban developments, which

With the interval of ten years between censuses, the estimates tend to get out of line. The series of estimates will be more accurate and more useful when they are based on a census every five years, instead of letting differences accumulate for ten years. This is recognized in a number of countries which now take agriculture census at least every five years and, in some instances, annually. In addition, a five year census provides information by small geographical areas twice as frequently as a decennial census. It is not practical to secure data by small areas through sample surveys.

While the coming census will be a "First" for the nation, it will not be new for the prairie provinces. Five year census have been taken for more than half a century and were started to keep track of the many changes wrought by the rapid settlement and development of the area. The value of five year census has been borne out in the west, particularly in times of rapid growth and distribution change such as many other provinces are now experiencing.

The bureau's recommendation for a 1956 census was made in response to repeated requests from provincial and municipal governments and from non-government organizations with varied interests, all of whom need accurate figures to assist in keeping their operations on a sound footing. An important consideration to all users is timeliness of the information. Because of the nature of the com-

GARDEN NOTES—

Changes needed in lawn care when summer heat comes

When real summer heat comes, one should make a few changes in the regular lawn care. Grass is a cool and moist loving plant and in most parts of Canada it is not likely to get that sort of weather in July and August. It won't make much growth when the thermometer goes much above 75. In consequence one should cut less often in hot weather and also

set the mower higher. And even if we remove the clippings earlier in the spring, it is a good plan to let them lie where they fall in the summer. They will make a mulch which, with the longer grass, will protect the roots from the burning sun.

Early summer, when the nights get fairly warm, is the best time to apply the chemical weed killers. Used with reasonable care it is amazing how these will wipe out dandelion, plantain and most broad leaved weeds. One should cover the whole lawn but one must be careful to miss any flowers or shrubbery because these sprays will seriously damage if not kill them.

For a real job one should always repeat the spraying in about three weeks to a month's time. This second application will catch those weeds which have sprouted from seed since the first treatment. It is best to keep one spray for this weed killing business only, otherwise one must be most careful to wash machine and nozzle thoroughly before using for any other purpose.

Keep planting

There is a strong temptation when the weather really turns warm to get out and dig and plant the whole garden on a single afternoon. Experienced people, however, restrain that natural urge. They know that there is no great rush and if they spread the planting over several weeks or more, likewise the harvest and the pleasure of gardening will be spread out. Even with flowers, some spreading is desirable as we are thus assured of longer bloom and if the weather suddenly turns against us, we have not lost everything.

With vegetables, the wise gardener will sow standard things like beans, beets, carrots, corn, radish, lettuce, and so on not once but at least three times from two to three weeks apart. In this way there will be something coming along always, and at its best. New, quickly grown vegetables are always the most tender and some of them, like corn and beans, remain only at top quality for a few days.

Flower Planting Hints

Flower varieties such as Asters, Dahlias, Zinnias and Marigolds will be most satisfactory in a soil to which manure or fertilizer has been added, while Poppies, Cosmos, Portulaca, Centaurea, Alyssum and Godetia will give excellent results in poor soil.

If space is available annuals for cut flowers should be grown in a row in the vegetable garden. Among the best varieties for this would be Snapdragon, Aster, Calendula, Annual Chrysanthemums, Gaillardia, Baby's Breath, Sweet Pea, Salpiglossis and Zinnia.

Watch for bugs

With so many easily applied chemical mixtures on the market, there is little if any excuse for having our flowers and vegetables damaged by insects or disease. It is no longer necessary to prepare various concoctions. All that one has to do is to go to the nearest seed store, tell them our troubles and get some handy preparation which is simply dusted or sprayed on. For every bug or disease there is a specific cure or control. The main thing is to start control measures just as soon as the first injury appears. Treatment is not expensive.

Cologne to have first mono-rail

The world's first one-rail railroad is to be built near Cologne this year.

The city parliament has voted to accept an offer from Swedish multi-millionaire Axel Wenner-Gren's Alweg Mono-rail Co. to construct a two-mile section free of charge at suburban Flittard.

Company officials said they trust this test section will help win over the city fathers to approve funds for a projected Mono-rail between Cologne and the town of Opladen—about 11 miles.

Construction costs for the complete Cologne-Opladen railroad, including 24 cars for 100 passengers each, are estimated at \$8,806,000.

Alweg officials say the Mono-rail train can do 100 miles an hour and is safe as a conventional train. It runs on small rubber wheels clinging to a rail-like track of concrete. The smooth surface of the track permits shockless travel.

Skin divers' victory is 'bitter' one

Eight saddened Australian skin divers found recently that their battle against man-eating sharks to bring up five bottles of 70-year-old whisky from a sunken 19th century schooner was for naught—it had turned bitter as gall.

"Burning and unpleasant," moaned Lyle Davis after swigging from one of the five encrusted bottles brought to the surface.

Sadder still was the thought that 40 feet down in the sunken hulk were 80,000 more gallons of the worthless bitter brew.

The skin divers, bristling with tomahawks, knives and fishing spears, fought a titanic battle with the sharks for possession of the wreck, the Scottish Prince, which sank near here four months after clearing Glasgow, Scotland, in October, 1886.

Sharks attack

Three 10-foot sharks lurking in the wreck attacked them. One of the frog men lashed out with a tomahawk and whipped a shark's tail off. The others fled.

The eight, trained in Australian inland waters by Davis, head of the Underwater Spearfishing Club, glided silently through the ghost ship.

Then one by one the encrusted bottles were gently and triumphantly brought to the surface.

But even then the divers' fight was not over. Hawk-eyed Customs men were the first to greet them on the surface, and promptly whisked the bottles away to a bonded warehouse.

All five bottles—three Scotch and two Irish—seemed to have withstood the underwater storing. The corks didn't even pop under the change of pressure when brought to the surface.

But then the first taste—and a drinker's paradise was shattered.

Funny and Otherwise

Long - suffering Husband - Ruth, you promised you wouldn't buy another new dress. What on earth made you do it?

Modern Eve—Dear, the devil tempted me.

Long - suffering Husband - Well, why didn't you say, "Get thee behind me, satan?"

Modern Eve—I did, and then I heard him say, "It fits you just beautifully at the back."

"How do you like your new boss, my dear?" asked Jill's mother.

"Oh, he isn't so bad, Mummy; rather bigoted, that's all."

"What do you mean, bigoted?"

"Well, he thinks words can be spelled only one way."

They were sitting on the veranda in the moonlight. No words broke the stillness. She began to yawn.

"I say," she said, suddenly, "suppose you had money, what would you do?"

"I'd travel," answered the bore, closing his eyes dreamily.

He felt a small hand in his, and sighed happily. When he looked up again she had gone.

In his hand was the bus fare.

"How come you didn't hold your lodge meeting last night?" one man asked another.

"A little trouble," explained the second. "The Supreme Exalted Grand Potentate's wife wouldn't let him out of the house."

The ancient Greek orator, Demosthenes, put pebbles in his mouth to improve his speech.

Stomach punches, plunger blows rout burglar

Two plucky Minneapolis women, surprised by a burglar who entered their bedroom, used stomach punches in combination with telling blows with a bathroom scale and a plumbing plunger to rout the husky intruder recently.

Elsie Urista, 27, beat the man over the head with the plunger. Her mother, Mrs. Pearl Urista, 71, threw the bathroom scale and conked the burglar on the head.

"Let me out of here," the man yelled, but Miss Urista refused to let him retreat in dignity. She struggled with the intruder all the way down the stairs and to the back door.

"I didn't chase after him," she explained. "I had my nightgown on."

"I say," she said, suddenly, "suppose you had money, what would you do?"

"I'd travel," answered the bore, closing his eyes dreamily.

He felt a small hand in his, and sighed happily. When he looked up again she had gone.

In his hand was the bus fare.

"How come you didn't hold your lodge meeting last night?" one man asked another.

"A little trouble," explained the second. "The Supreme Exalted Grand Potentate's wife wouldn't let him out of the house."

The ancient Greek orator, Demosthenes, put pebbles in his mouth to improve his speech.

Fashions Sew-easy separates

by Anne Adams

Separates with a smooth coordinated look—smart fashion any season! This twosome is a cinch to sew; classic blouse in three sleeve versions—favorite full-circle skirt below. Ideal for cottons in gay plaid, check, print!

Pattern 4533: Misses' Sizes 12, 14, 16, 18, 20; 30, 32, 34, 36, 38, 40, 42. Size 16 blouse takes 1 1/2 yards 35-inch fabric; skirt 4 yards.

This pattern easy to use, simple to sew, is tested for fit. Has complete illustrated instructions.

To obtain this pattern send twenty-five cents in coins (stamps cannot be accepted) to:

Anne Adams Pattern Dept., Department P.P.L., 60 Front Street W., Toronto.

Be sure to write plainly your Name, Address and Pattern Number.

Research and planning said forestry need

PRINCE ALBERT—Saskatchewan needs more long-term research and planning, to keep its forest industry profitably productive.

That, in a nutshell, sums up the thinking of provincial foresters, expressed at the annual Technical Foresters' Conference, held here recently.

One suggestion included the setting up of a "code" to serve as a guide to action over the long term. From it would come "rules and procedures and policies, and from them would come schedules, forecasts, graphs and maps."

To keep the present timber industry alive and promote use of tree species not presently harvested, recommendations were made to have harvesting of timber stands carried out on a partial cut basis, with repeated cuts at short intervals; the practicing of closer utilization in the woods and at the mill; and the salvaging of defective and damaged timber more promptly and completely.

Foresters at the conference expressed the general thought that advancing technology in forest products, along with new and faster methods of transporting raw wood overland, would bring utilization of Saskatchewan's tremendous pine and poplar areas.

This, coupled with the growing consumer market for wood products, assured Saskatchewan of "an expanded forest industry fully utilizing out forest crop."

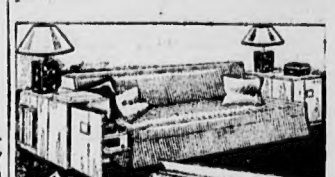

FOR YOUR GARAGE

Lantern cupola atop the roof; storage unit

When you make this glass cupola for the garage the light from the barn lantern that hangs from the ceiling will be a happy medium between a flood light and a full moon. On the darkest night there will be a friendly glow over the premises. The glass sides are four basement windows. The curv-

ed rafters and the roofing sections are cut from a pattern which includes details for fitting the cupola to the roof. Either a barn or a railroad lantern is wired with fittings from the hardware store. The chandelier weathervane and an American Indian tracing design are on pattern 241. Patterns are 35c each. The Homestead Improvement Packet of five patterns for other valuable outside improvements is priced at \$1.50 post-paid.

STORAGE UNIT BACK FOR A WIDE COUCH—PATTERN 299

This storage unit turns a studio couch or a single bed into a daytime sofa with modern lines. Large detailed drawings on the pattern show each step from making the frame to the finished job as it appears in the sketch. Pattern also carries perspective drawing with diagrams to show how 6 1/2 yards of 48-inch-wide materials may be cut to make a cover for a full length 39-inch wide bed and also for the front of the storage compartment. The upholstery directions will guide the weekend furniture builder to perfect success. Pattern 299 for the storage unit and 300 for the music cabinet are 35c each.

Address order to:

Home Workshop Patterns, Department P.P.L., 4488 West 5th Avenue, Vancouver, B.C.

Issuing two new postage stamps in June

Two new stamps will be issued June 7, 1956, emphasizing the importance of specific industries in Canada. One, based on the chemical industry, will be a 25-cent stamp, red in color and one and one half inches high by one inch in width. The second stamp, based on the pulp and paper industry, will be a 20-cent stamp, green in color, one and one half inches in width by one inch high. The sizes are approximate.

First day covers must be forwarded to the Postmaster, Ottawa 2, Ontario, to arrive not later than June 5, 1956. In view of the high denomination of this stamp, no cover service fee is being charged, the Post Office department circular states.

Broadcloth was originally a silk shirting, so named because it was woven in greater widths than the usual 39 inches.

Don't Neglect Slipping FALSE TEETH

Do false teeth drop, slip or wobble when you talk, eat, laugh or sneeze? Don't be annoyed and embarrassed by such handicaps. FASTEREETH, an alkaline (non-acid) powder to sprinkle on your plates, keeps false teeth more firmly set. Gives confident feeling of security and added comfort. No gummy, sticky, nasty taste or feeling. Get FASTEREETH today at any drug counter.

Helps You Reduce Swollen Painful Piles

Here is a nice, clean, easy way to get real relief from the nagging distress of swollen, painful piles without the inconvenience of ointments, pile pipes or suppositories.

The secret is in taking just one small Hem-Roid Tablet, with water, two or three times a day. Works through effective INTERNAL action. Quickly eases constipation, relieves itching, soreness and pain. Helps shrink piles and permits them to heal.

Why suffer needlessly when Hem-Roid offers you so much. Get a package today. See for yourself how nice Hem-Roid is to use, how effective it is and how much more comfort it will quickly bring you. All drug stores. Low cost. Money refunded if you are not 100% pleased.

Sweet and cool in any Pipe

BOZO

By Foxo Reardon

RCAF 'Goose' flies north with geese

Each year when geese wing their way north, the RCAF's No. 408 Photo Squadron, nicknamed the "Goose" flies with them. This year is no exception.

Late in April most of the Photographic Squadron based at RCAF Station Rockcliffe left the Ottawa area for Arctic detachments located at Cambridge Bay on Victoria Island and at Fort Churchill, Man. From these northern units more than 300 members of the Air Force Photo unit began extensive SHORAN aerial surveys over the Arctic Islands.

Marking the first time that SHORAN operations have been undertaken in so northerly a region, four Lancasters, six ski-wheel Dakotas, three Otters, and four Canos will cover an area extending from the 69th parallel of latitude northward to the 75th. Full SHORAN coverage of this region is expected to be completed by late August.

SHORAN, an extremely accurate method of aerial survey, employing radar to measure distance, was first undertaken by 408 Squadron in 1949. This unique method has eliminated hundreds of years of work by ground survey needed to cover the same area. SHORAN has proven more accurate than any other system. From the instrument-packed Lancasters, radar pulses are transmitted to radar ground stations. The time taken for the pulse to travel from the aircraft and return from the ground station is measured, divided in half, and converted into units of distance. From these calculations definite control points in terms of latitude and longitude can be established, upon which the aerial photos for map-making can be located accurately.

Aerial photos of Canada, taken by the RCAF and commercial operators during the past 34 years, tells Canada's map-makers what the country looks like—SHORAN tells them where the photos fit.

The 1956 program of aerial surveys will be followed next year by extension of the SHORAN net to the tip of Ellesmere Island to complete the basic SHORAN job for Canada.

SOME FEAT!

Joe Richard Nance, a farmer, walked 45 miles from Murray to Paducah in nine hours and 50 minutes. Offered \$100 for a repeat performance, he walked the same route again and broke his own record. The time, eight hours and 53 minutes.

SOVIET CHIEFS AT BRITISH ATOMIC CENTRE — Russian Communist Party Chief Nikita Khrushchev and Soviet Premier Nikolai Bulganin watch as a British atomic research scientist explains the display of atomic energy materials at British atomic research centre at Harwell, near London.

Large number of children suffered from poisoning, overdosages during 1955

REGINA.—"A large number of the 7,000 children estimated to have been injured in Saskatchewan accidents during 1955 suffered from household poisoning and overdosages," Christian Smith, director of health education for the provincial health department, said.

£50 Reward for simple translation

WESTON-SUPER-MARE, England.—A reward of £50 was offered recently to anybody who can translate into simple English a letter received from the government Housing Ministry.

The money was posted by the Weston Hotels Association, which recently asked the Ministry to define the difference, for tax purposes between a hotel and a private house which rents out rooms. The Ministry's reply:

"For the purposes of this act the hereditament, which is used for the letting of rooms singly for residential purposes shall be deemed not to be used for the purpose of a private dwelling or private dwellings if the whole or substantially the whole of the available accommodation is used for such lettings, but save as aforesaid a hereditament shall not be deemed for the purpose of this act to be used otherwise than wholly for the purpose of a private dwelling or private dwellings by reason that one or more rooms therein are let for residential purposes."

"Saskatchewan Hospital Services Plan records show that 370 Saskatchewan people were treated as bed patients in 1955 as a result of poisoning, and that of these 198 were children under 15 years of age. Six children died of poisoning, according to the department's mortality records.

"The plan's figures do not include persons treated at home, in doctors' offices or in out-patient departments of hospitals. Thus we find that the out-patient department of Regina General Hospital alone looked after 30 poisoned children. Obviously, then the number of children treated in the province as a result of poisoning was much greater than the 198 shown on S.H.S.P. records," Mr. Smith pointed out.

"This is why some United States safety authorities estimate that there are about 150 non-fatal accidents for every fatality. It is extremely difficult if not impossible to determine exactly how many people are injured but it is known that not a single Saskatchewan municipality was free of accidents last year.

"On the basis of the American formula 900 children suffered from poisoning in our province last year. We estimate conservatively that there are 75 non-fatal accidents for every fatality, which gives us a total of 30,000 accidentally hurt in Saskatchewan last year, including 7,000 children, and 450 children the victims of poisoning.

"Druggists of the province are co-operating in an all out attack on poisoning accidents, which of all mishaps to children are the most easily preventable," Mr. Smith continued. Drugstores have been supplied with large quantities of a new folder directing householders to keep medicines, household cleaners, bleaches, and other substances out of children's reach and to dispose of old medicines safely. These are being distributed among the public.

The professional organization, the Saskatchewan Pharmaceutical Association, has joined the health department in a "home hazard hamper" competition in which the public is invited to name 30 potential substances and objects commonly involved in childhood accidents in the home. The association is offering four cash prizes and the competition will close June 10, with winners to be announced at the annual convention in Saskatoon later that month.

"These activities will help materially to make parents aware of the dangers and encourage them to take preventive measures," Mr. Smith said.

DOUBLE TRAP

His dogs caught a coyote and Frank Pfaff of Homestead, Oklahoma, found a chain and bell around its neck. On it was the name of a person who lived 35 miles away. Apparently the coyote had been caught in a trap and then released with the warning bell.

United States navy has own version of the 'rope trick'

The U.S. Navy has developed its own version of the fabled "Indian rope trick" for reliable communications in the remote stretches of the Arctic.

The trick involves suspension of an antenna from balloons trailing about 1,200 feet above a ship. With the vertical or "skyhook" antenna a ship in the icefloes of the Arctic is able to maintain radio contact with land-based radio stations 1,500 miles away.

The Navy turned to the "skyhook" antenna because of the difficulty icebreakers in the Far North had in maintaining radio contact with their short, conventional antennas mounted between masts. Radio communications there are extremely difficult and subject to such interference as ionospheric blackouts, sunspots and electro-magnetic storms.

Experiments in the Arctic indicated that reliable communications could be maintained by using low frequencies around 200 kilocycles. But such frequencies require an antenna about 1,200 feet long—obviously longer than any icebreaker could string out horizontally between masts.

'Skyhook' alternative

The only alternative was a vertical wire or "skyhook" antenna. The Navy gave serious consideration to several devices to lift the antenna wire—including a miniature, remote-controlled helicopter—but finally decided on small zeppelin-type balloons.

The balloons were developed by the Naval Research Laboratory and successfully tested out aboard an icebreaker, the USS Glacier. The balloons, which are raised and lowered by a small electric winch on the icebreaker's deck, are about 30 feet long and designed to withstand the extreme icing conditions and buffeting of the strong winds of the Arctic.

With the balloon-raised antenna system, the Navy expects that ships in the Arctic will have a reliable communications range of about 1,500 miles using a 1,200-foot vertical antenna and a transmitter operating with a power output of 1,500 watts.

The system will have the added advantage that it can be used for aerological studies and weather observations.

HAND CLAPPING

The custom of hand clapping comes from the ancient Romans, who had a set ritual of applause for public performance, expressing degrees of approval—snapping the finger and thumb, clapping the hands, etc.

WEEKLY BIBLE COMMENT

SUFFERING BRINGS

FELLOWSHIP IN CHRIST

When Jesus hung upon the cross, one of the two thieves between whom He was crucified reviled Him, urging Him to save Himself and them. The other thief rebuked his fellow, reminding him they were suffering justly for their misdeeds, whereas Jesus was suffering for His innocence and goodness. The penitent thief had the reward of hearing Jesus say, "This day thou shalt be with me in Paradise."

It is the distinction between two kinds of suffering which Peter emphasizes in his writings that does so much to encourage suffering Christians.

The Christian who suffers is a partaker of the sufferings of Christ. Instead of being embittered, he may well glorify God.

Certainly as we observe life, we can not very well say that the ideal life is entirely free from suffering.

We have seen those who have accepted the way of suffering patiently and in subjection to the will of God emboldened by their experience, finding a deep satisfaction in life often denied to those whose ways have been easier and more pleasant.

Peter brings this philosophy of endurance of suffering into the realm of Christian faith and practice, emphasizing the part of humility and the strength that comes to men through casting all their cares upon God.

The mystery of pain has never been solved. We do not know why the innocent suffer with and for the guilty. We do know, however, that there is a fellowship in Christ's suffering which has brought to suffering Christians happiness and peace. And this, too, is a mystery.

LOST IS FOUND

While packing tea bags for a Boston firm, Mrs. Margaret Lowery, 20, inadvertently dropped her diamond ring in a carton. But now the ring is back on her finger. It was recovered after being traced to a Chicago company to which the carton had been shipped.

So good

Here's bread with a tasty difference! Dependable Fleischmann's Active Dry Yeast makes it quick and easy!

Rolled-oat Bread

1. Measure into bowl
1 cup rolled oats
2 teaspoons salt
1½ tablespoons shortening

Stir in

- 1½ cups boiling water and let stand until lukewarm.

2. In the meantime, measure into a large bowl

- ½ cup lukewarm water
2 teaspoons granulated sugar

and stir until sugar is dissolved. Sprinkle with contents of

- 2 envelopes Fleischmann's Active Dry Yeast

Let stand 10 minutes, THEN stir well.

Stir in prepared rolled oat mixture and

- ¾ cup lightly-packed brown sugar
2 tablespoons molasses
2 cups once-sifted all-purpose flour

and beat until smooth and elastic. Work in an additional

- 2½ cups (about) once-sifted all-purpose flour

3. Turn out on lightly-floured board and knead until smooth and elastic; place in greased bowl. Brush top of dough with melted shortening. Cover. Let rise in warm place, free from draft, until doubled in bulk—about 1 hour.

4. Punch down dough. Turn out and divide in half. Let rest 15 minutes, then shape each half into a loaf. Place in greased loaf pans (8½ x 4½ inches, top inside measure). Brush with melted butter, margarine or shortening. Cover. Let rise until doubled in bulk—about 45 minutes. Bake in moderately hot oven, 375°, about 50 minutes. Yield: 2 loaves.

ATTENTION

OWNERS AND OPERATORS OF MOBILE CONSTRUCTION EQUIPMENT

Your attention is drawn to the fact that all mobile construction equipment is required to be licensed annually under provisions of the MOBILE CONSTRUCTION EQUIPMENT LICENSING ACT before such equipment may engage in construction work in any town, village, municipal district, county, improvement district or special area in the Province of Alberta.

"MOBILE CONSTRUCTION EQUIPMENT"

- (I) means machinery or equipment constructed or manufactured for use in construction work, capable of being moved to its place of use under its own power or by being towed, pulled or carried and not intended to be affixed to realty, and
- (II) includes movable bunk, cooking and dining houses used to serve persons engaged in construction work but
- (III) does not include trucks licensed under The Vehicles and Highway Traffic Act or The Public Service Act, exclusive of mounted equipment on such trucks.

"CONSTRUCTION WORK" MEANS THE OPERATIONS REQUIRED

- (I) for screening and washing sand and gravel or for excavating and loading or for breaking and clearing, or
- (II) for the construction or maintenance of a road, sidewalk, building, structure, bridge, culvert, dam, drainage system, irrigation system, airport, pipe line, power line, grades, strip mining, or other work of like nature.

Provision is contained for the imposition of a fine and possible impoundment of equipment where a violation of the Act occurs.

A copy of the Mobile Construction Equipment Licensing Act may be obtained upon payment of thirty-five cents from the office of the Queen's Printer, Highways Building, Edmonton, Alberta.

Address all enquiries regarding MOBILE CONSTRUCTION EQUIPMENT LICENSES to the DEPARTMENT OF MUNICIPAL AFFAIRS, Edmonton, Alberta.

GOVERNMENT OF THE PROVINCE OF ALBERTA
 DEPARTMENT OF MUNICIPAL AFFAIRS

Hon. A. J. Hooke,
 MINISTER

A. W. Morrison,
 DEPUTY MINISTER

NOTICE

The special Committee appointed by the Legislative Assembly at the recent Session for the purpose of reviewing the provisions of the Alberta Liquor Control Act in order to recommend amendments thereto, will receive written briefs from interested persons, groups, and organizations prior to June 1st, 1956.

Representatives in support of the briefs submitted by organizations or groups only will be heard commencing June 18th.

Organizations and groups that submit briefs will be advised when to appear before the Committee.

Twelve copies of the briefs should be sent to: The Clerk of the Legislative Assembly, Legislative Building Edmonton.

R. CREVOLIN,
 Secretary of Committee.
